MUBOO OPTICAL

Lens Refractive Index

Lens measurement for optical stores and laboratories

MORE LENS DATA, IN ONE INSTRUMENT

- Standard lens refractive index (nd)
- Lens center thickness
- Sphere, cylinder, axis and prism power
- UV and blue-light transmittance
- 9.0-inch HD touch LCD display

Results in as little as 0.5 seconds.

Confirm measurement conditions with your quotation.

TECHNICAL OVERVIEW

Sphere power	-25 D to +25 D
Cylinder power	-10 D to +10 D
Cylinder axis	0-180°
Prism power	0-15 Δ
Lens center thickness	0.1-20 mm
Lens refractive index	1.30-1.90
Display	9.0-inch HD touch LCD

Confirm power supply, dimensions, weight, interfaces and supplied accessories before ordering. Final configuration is confirmed in the quotation.
